ERIA[®]

USER MANUAL
SMART LED STRIP (EU)

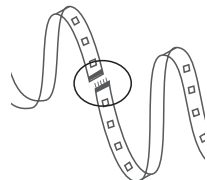

The AduroSmart ERIA Extended ColorStrip is a smart LED light strip that you can control via your smartphone or tablet by using the AduroSmart ERIA app and AduroSmart ERIA Hub.

You can change its colors and color temperatures, control individual lights or multi-room lights, set timers and more.

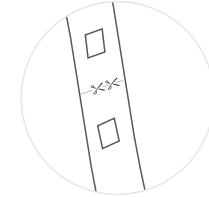

www.eria-smart.com/manuals/strip

1. Extend the strip to the required size by connecting the individual strips with each other using the connectors.

Maximum: 6m

2. If you would like to shorten the strip than you are able to cut the strip at the scissor symbol.

ERIA 6m. Extended Color LED Strip

4A. Download the AduroSmart ERIA App from the Apple App Store or from Google Play or go to <http://adurosmart.com/adurosmart-app/>

Android

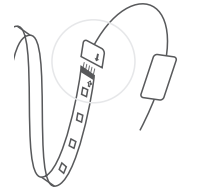

IOS

4B. If you have a **third party ZigBee compatible hub** then **proceed to step 12.**

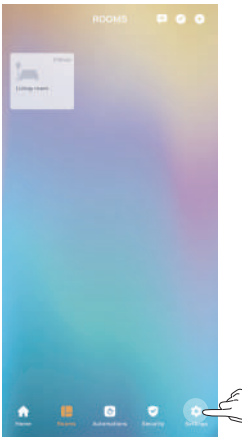

3. Connect the control module and connector to the strip as indicated by the arrow.

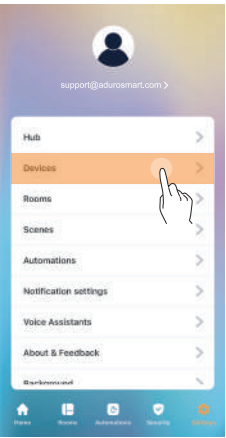

5. Open the AduroSmart ERIA APP. (For latest version, please check its online user manual.)

6. On the bottom right corner press on "Settings".

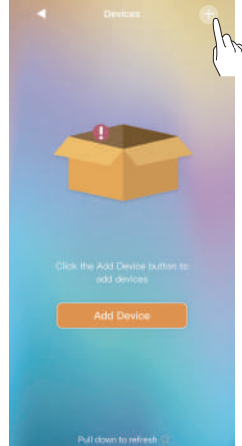

7. Select "Devices".

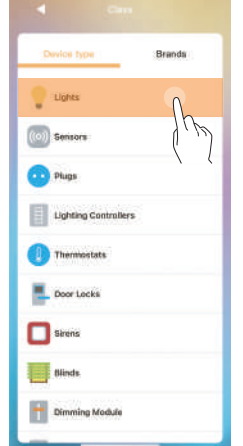

说明书反面

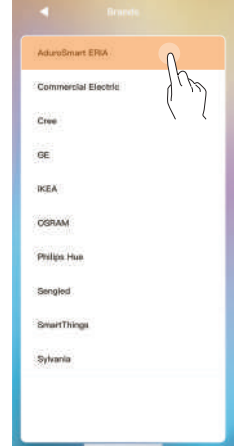

8. On the top right corner press on the "+" symbol then press on "Add device".

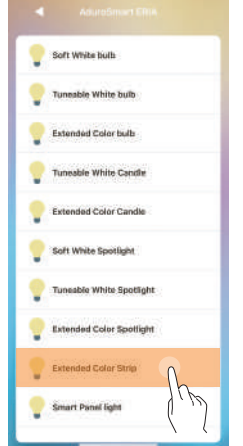

9. Select the device type.

10. Press on "Brands" and then select "AduroSmart ERIA".

11. Press on "Extended Color strip".

12A. Power the strip by connecting the DC head of the control module to power plug, then insert the plug in the power outlet.

After powering the strip will enter pairing mode for **60 seconds**.

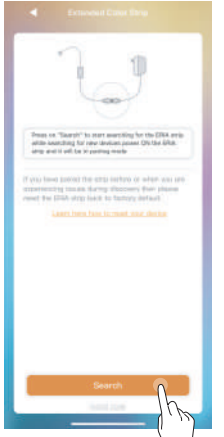

12B. If you have a **third party hub**, then this is the moment to **initiate the search from your Smart Home hub app**.

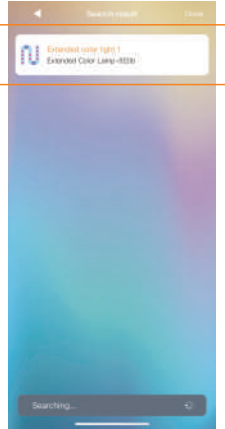

13. If the device can't be connected with the hub, please reset the device.

Disable and enable the power to the strip controller for 5 times. The strip will flash 3 times to confirm the reset. Power the strip ON and proceed with step 12.

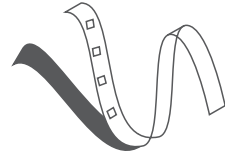

14. Proceed by pressing on "Search" to allow the ERIA hub to find the strip, the LED indicator on the hub will **flash green** this indicates that the hub is searching for devices.

15. When the strip has been found and paired successfully it will **turn green** and it will show up in your search results, press on "Done" to complete the process.

16. Clean the surface to which you want to attach the strip on and remove the protective seal from the back of the strip then use the adhesive back to fix the strip onto the surface.

17. **Troubleshoot**

If the Adurosmart strip is not recognized by your smart home hub then follow the below procedure to reset the strip back to factory default.

Disable and enable the power to the strip 5 times so that it turns ON/OFF 5 times. The strip will then flash 3 times to confirm the reset. Power the strip ON and proceed with step 12.
